

SBF GRID

Standardized Bridge Fitting

Step 1:
Place center of lowest part of bridge on line A.

Step 2:
Align inside of left nose pad with the spot where lines B and X meet. Place a mark on line B where the right nose pad starts. Follow this mark to the corresponding number.

Step 3:
Slide frame to the right until the inside of the left nose pad aligns with the spot where lines C and X meet. Place a mark on line C where the right nose pad starts. Follow this mark to the corresponding number.
